

of the absorbent article, as depicted in Figure 9b. Alternatively, the desired placement of attachment wing 19 may be in closer to first portion 3. Optionally, upper surface 21 of attachment wing 19 may have absorbent article attachment means 80, adhesive applied thereon 80. The use of attachment wing 19 is entirely optional and may even be omitted by the wearer. Please add amend the paragraph at page 12, line 20:

Turning to Figure 10, there is depicted a thong pantliner having a layered portion including a cover 67, a transfer layer 100, an absorbent core 1 and a backsheet 2 and two attachment wings 19 having upper surface 21.

Please amend the abstract as follows:

--An absorbent article with a silhouette having a first end portion having a maximum width and a second end portion having a maximum width, wherein the second end portion being in opposite relation to the first end portion and the maximum width of the first end portion is greater than the maximum width of the second end portion and a first longitudinally extending edge and second longitudinally extending edge being in opposed relationship between the first portion and the second portion; a layered portion including an absorbent core and a backsheet; at least one wing laterally extending from the first longitudinally extending edge or the second longitudinally extending edge, wherein the wing is releasably attached to the first or second longitudinally extending edge.
